

EIMod Bluetooth

Installation instructions and user manual

Read these instructions carefully before proceeding with the installation! Liability for damage due to improper installation or non-observance of these instructions is expressly excluded.

EIMod Bluetooth is an add-on board for EIMod Fusion central units. It provides configuration and monitoring of the central unit as well as control of the model through Bluetooth® connection.

Compatibility

The requirements for operation are:

- an EIMod Fusion central unit
- a computer or notebook with Microsoft® Windows® (64-bit) or Apple® MacOS® (from version 10.10 Yosemite) operating system with Bluetooth capabilities (e.g. via a USB stick or built-in hardware)
- a tablet or smartphone with Android® 5.0.1 "Lollipop" or higher

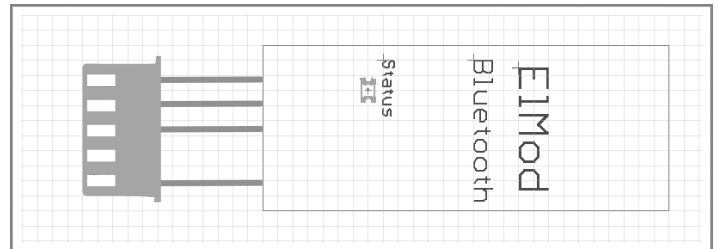

Connection

EIMod Bluetooth is connected to the same connector that is used to attach the USB adapter. It is labeled "USB/BT".

Status

EIMod Bluetooth has a red status LED:

- fast blinking: no connection
- double blinking: connection established

Setup with Apple® MacOS® and Microsoft®

Windows®

EIMod Bluetooth is available as a Bluetooth® device immediately after switching on. The actual pairing must be done manually before first use:

- start the search for Bluetooth® devices on your Windows® computer.
- EIMod Bluetooth appears under the name EIModBT followed by a unique serial number
- if you are asked for a PIN number, enter 0000
- as soon as the connection is established, the red status LED will blink in a double pulse.
- now start the EIMod App. After a few moments the usual display of the EIMod App appears

Setup with Android®

- launch the EIMod App on your Android® device. This is available for free in the Google® Play Store®.
- now you can start the search for the EIMod Bluetooth over toolbar of the EIMod App.
- EIMod Bluetooth appears as EIModBT followed by a unique serial number
- if you are asked for a PIN number, enter 0000
- as soon as the connection is established, the red status LED will blink in double cycle
- after a few moments the status page is displayed with information about the connected central unit
- by swiping left and right you can switch between the different display modes
